

Energy consumption and energy mix	u.m.	2025	2024
Fuel consumption from coal and coal products	MWh	0	0
Fuel consumption from crude oil and petroleum products		454,879	441,218
Fuel consumption from natural gas		152,612	153,903
Fuel consumption from other fossil sources		0	0
Consumption of electricity, heat, steam or cooling from fossil sources, purchased or acquired		15,019	16,950
Total energy consumption from fossil sources		622,510	612,071*
Share of fossil sources in total energy consumption	%	58	59
Total energy consumption from nuclear sources**	MWh	85	66***
Share of nuclear sources in total energy consumption	%	0.01	0.01
Fuel consumption from renewable sources****	MWh	16,743	1,394
Consumption of electricity, heat, steam and cooling from renewable sources, purchased or acquired		416,028	411,749
Consumption of self-generated non-fuel renewable energy		17,586	9,890
Total energy consumption from renewable sources		450,357	423,032*****
Share of renewable sources in total energy consumption	%	42	41
Total energy consumption	MWh	1,072,952	1,035,168

* The figure in the 2024 Consolidated Sustainability Statement stood at 572,732 MWh.

** It is specified that the value of energy consumption from nuclear sources is estimated as a percentage of electricity consumption from non-renewable sources, applying the relevant residual mix developed by AIB.

*** The figure in the 2024 Consolidated Sustainability Statement stood at 0 MWh.

**** The renewable fuels used by the Group are HVO and SAF.

***** The figure in the 2024 Consolidated Sustainability Statement stood at 425,967 MWh.

Energy intensity	High climate impact sectors		
	u.m.	Section H - Transport and Storage	
		2025	2024
Energy consumption*	MWh	472,862	433,181
Net revenue**	€	3,948,000,000	3,843,000,000
Energy intensity	MWh/€	0.00012	0.00011

Energy consumption and energy mix

*For the figure on energy consumption, consider only the consumption associated with sector H "Transport and Storage" related to activities in the logistics sector.

**The revenue figure for the "Transport and Storage" segment is calculated in line with the accounting standards IFRS 15 (see table in paragraph 4.4 Operating segments of section 02. Poste Italiane's Financial statements at 31 December 2025

Total emissions	u.m.	2025	2024
Scope 1 emissions			
Scope 1 gross emissions	tCO2e	151,173	147,342
Scope 1 emissions covered by regulated emissions trading schemes	%	29	32
Scope 2 emissions*			
Scope 2 location-based gross emissions	tCO2e	93,817	93,329
Scope 2 market-based gross emissions		3,709	4,039
Scope 3 emissions			
Total Scope 3 gross indirect emissions	tCO2e	59,038,360	61,279,487
1. Purchase of goods and services		461,460	424,741
2. Capital goods		227,939	152,732
3. Fuel and energy activities		47,370	36,304
4. Upstream transport		280,504	258,017
5. Waste generated by activities		532	374
6. Business Travel		6,312	6,350
7. Employee commuting		117,335	87,872
11. Use of products sold		321,783	191,573
15. Investments**		57,575,125***	60,121,524****
Total emissions (location-based)			59,283,373
Total emissions (market-based)	59,193,242		61,430,868

Scope 1, 2, 3 gross GHG emissions and total GHG emissions

*For the calculation of Scope 2 location-based emissions, total energy consumption for electricity (from renewable and non-renewable sources) and thermal energy are considered. For the calculation of Scope 2 market-based emissions, only consumption from nonrenewable sources is considered. Regarding the instruments used, 99.6% of electricity is certified guarantee of origin.

**Category 15 "Capital expenditure", calculated according to the PCAF methodology, considers issues related to the following asset classes: "Listed equity and corporate bonds" and "Sovereign debt".

***The calculated figure, with reference to the emission values of government bonds, is "excluding LULUCF"

****The calculated figure, with reference to the emission values of government bonds, was produced using data from the external infoprovider MSCI. The data is based on the calculation of emission intensity, used for the purposes of the PAI (Principal Adverse Impacts) indicator, in relation to the exposure to government issuers present in investment portfolios.

Biogenic emissions	u.m.	2025	2024
Biogenic emissions related to direct consumption of HVO and SAF	tCO2e	2,544	238
Biogenic emissions related to indirect consumption of HVO and SAF		10,396	0

Emission intensity	u.m.	2025	2024
Total emissions (market-based)	tCO2e	59,193,242	61,430,868
Net revenue*	€	13,588,000,000	12,927,000,000
Emission intensity	tCO2e/€ (%)	0.004356	0.004752

*The net revenue figure is calculated in accordance with the accounting standards set out in IFRS 15 and IFRS 17 (see the tables in paragraph 4.1 Consolidated Financial Statements in section 02. Poste Italiane's Financial statements at 31 December 2025).
